

ANNUAL REPORT

EUROPEAN SOCIETY OF VETERINARY DERMATOLOGY

ANNUAL REPORT E.S.V.D. N° 6, MARCH 1991

EDITOR : Richard E.M. Halliwell, M.A., Vet. M.B., Ph. D., M.R.C.V.S., Edinburgh, Scotland

LETTER FROM THE PRESIDENT

Veterinary Dermatology continues to be an active, exciting and dynamic field. The level of knowledge is rising steadily as more and more national and international post-graduate courses are organised. The increasing numbers of experienced dermatologists are accelerating the accumulation of knowledge and providing a greatly improved service in many areas. The demand for more sophisticated further education is rising. ESVD continues to play a significant part in this process of development by providing courses and meetings, by publication of the journal, Veterinary Dermatology, and by liaison with other European and World specialist organisations.

At present, ESVD is holding discussions with the European Community Advisory Committee for Veterinary Training, in conjunction with other specialist societies, with a view to setting up a system to allow for trans-national recognition of specialists. Considerable progress has already been made but much remains to be done and it is not yet possible to predict the kind of structure which will emerge from this process. However, it is clear that all of the specialists are keen to ensure that, as far as possible, uniformly high standards will be established throughout Europe, including countries outside the EC. A liaison committee of specialist societies has been set up to co-ordinate the views of the specialists. Reports of progress in this area will be published in the Bulletin in due course.

Within ESVD an important process of development and maturation is also in progress. We now have about 330 members and our annual meetings attract well over that number. It will be increasingly important to ensure that we maintain good communication with each other as our numbers rise.

This will be facilitated by the regular production of the Bulletin and I hope that you will not hesitate to submit material to the Editor, Ian Mason. Publication of ideas allows them to be discussed and considered by a wide variety of members in a way which is not possible during our busy annual meetings.

We are also aiming to make the Annual Report more informative. This year we have a much more detailed report of proceedings at the Annual Meeting and the Treasurers Report is also included. All members should by now have received a copy of the ESVD Constitution and will have read of discussions about the possible need to amend this (a topic which is under active consideration by the Board) in Volume 3, No. 1 of the Bulletin. The views of all members are solicited on this and I hope that you will not hesitate to contact Board Members with any ideas which you wish to put forward. Any possible changes will be considered at the Luxembourg meeting in July. This will be held in the European Hemicycle, and promises to be an excellent meeting. Details are given elsewhere in this report.

Another exciting meeting now being prepared will take place in Montreal, Canada in May, 1992. This will be the 2nd World Congress of Veterinary Dermatology and promises to be bigger and at least as enjoyable as the last. I hope that many European dermatologists will plan to attend. Our Annual Meeting in 1992 will be in Rome, in conjunction with the WSAVA. It will be intentionally a more modest meeting so as to avoid competing with the Montreal Congress but we can be certain that the warmth of Italian hospitality will not be at all limited.

D. H. Lloyd

REPORT OF THE 7TH ANNUAL MEETING OF THE ESVD, STOCKHOLM, 7TH - 9TH SEPTEMBER 1990

Looking at the headline one cannot help being impressed. 7th Annual Meeting — that's something. What a line of evolution we have been watching — from a little group of people gathered at WSAVA in Hamburg to big solitary congresses as have happened in the past years.

Stockholm! — For a Scandinavian it was nice that the ESVD at last tried to move away from Central Europe. Refreshing. The congress was beautifully situated in the archipelago of Stockholm, one of the most magnificent nature resorts one can think of. The conference centre had so many options for outdoor activities (bicycles, canoeing, rowboats, windsurfing, walking paths and more) that one easily could forget the congress had it not been for the efforts of the organising committee. Ewa, Helene and Ulla — You did so well.

The congress was attended by nearly 200 participants from 16 countries and offered several excellent speakers in many different subjects ranging from paleodermatology (Danny Scott's favourite in topical treatment) to new aspects of hyperadrenocorticism covered brilliantly by Stephen D. White. I've never seen as many cushingoid dogs as after being enlightened

in Stockholm. Subjects covered were nail disorders, seborrhea, feline eosinophilic granuloma complex, dermatoses induced by physical factors, EFAs, cutaneous drug eruptions — just to mention a few. Richard Halliwell, Ken Mason, David Lloyd, Didier Carlotti and many more, it will not be possible within this limited space to mention and pay tribute to all the fine lecturers we laid ears to. Sorry. Running parallel with the small animal programme was a large animal section. Sunday I had to leave before the congress was finished since we had a ferry to catch in Goteborg.

The social programme was fine with the contest featuring « panworld » dermatologists singing songs from home as the highlight. The Jury had a tough time but very justly chose Greece as the winner — absolutely a worthy and popular finalist.

Yet another good event — may many like this follow in the years to come.

These events cannot take place were it not for the sponsors, now so many number that I can't find space for your names. Thanks to all of You.

Kristian Pedersen
Denmark

THE ESVD IN 1990 : VIEWS FROM A DELEGATE

The Board has invited me to summarise my impressions of our organisation during this past year. I would like to discuss some of the strong and weak points of the ESVD during 1990 and my hopes for the future.

Overall, 1990 was a good year for the ESVD. In spite of occasional political problems, the board was exceptionally dedicated, and the board members must be thanked for all of their hard work and long hours during the past months. The ESVD bulletin and annual report were professional, and they served the purpose of keeping the members informed on the activities of the organisation.

I was unable to attend the Jersey course of dermatology of reptiles and birds but I understand that it was interesting and enjoyable. Despite complaints regarding the lack of microscopes, and poor delegate attendance, this course was a brave beginning in an area where relatively little is known. Perhaps, if veterinarians can be stimulated to take an interest in the dermatology of non-domestic species, the attendance at future meetings will improve.

The ESVD Annual Meeting in Stockholm was a meeting to remember. In spite of the expense, the repetition of topics already presented many times before, the scarcity of free communications and new information, the undemocratic election procedure, and the bad and cold weather, the meeting was definitely worth attending. The organisation was excellent.

The scientific programme was varied and included much equine dermatology. There were talks by several well-known dermatologists from around the world. This meeting was the birthplace of a new ESVD dermatopathology study-group. The annual business meeting served as a place for sounding new ideas and complaints. The meeting location was good, the housing and food were adequate, and the social atmosphere was friendly and entertaining. Special thanks should be given to the Swedish organisers for making this meeting worth attending.

I was unable to attend the dermatology oncology workshop in Barcelona because it was held just after the meeting in Sweden, but I understand that it was also quite successful. The programme was interesting and the material presented was at a high scientific level. In the future, I hope that the ESVD educational events will be separated so that veterinarians can spread-out the time and money spent at meetings.

In conclusion, the future of the ESVD seems encouraging and I am looking forward to 1991. The board seems to have listened to complaints from the membership, and exciting constructive changes are already taking place. We should soon see the rebirth of a more scientific, more democratic, and more accessible organisation.

Thierry Olivry
Clinique Fregis, Paris, France.

ESVD BULLETIN

The Bulletin is published approximately three times annually. Its aim is to keep members informed of forthcoming meetings, courses and developments in veterinary dermatology. It also forms a forum through which ESVD members can express their views on relevant scientific, administrative and political topics.

Contributions are invited from ESVD members. Please send them to the editor :

ESVD TREASURER'S REPORT

Balance of Accounts as on the 31.1.1990

	XEU
Balance	6 872 90
Income	27 148 72
Expenditure	<u>(20 941 48)</u>
Balance on 31.12.1990	13 080 14

Income

Veterinary Dermatology Subscriptions	9 419 13
Sponsoring	2 723 73
Profit from courses (Jersey, Lyon, Barcelona)	4 019 87
	<u>965 99</u>
	27 148 72

Expenditure

Telephone/Postage	779 90
Travel expenses	4 809 51
Meeting expenses : renting of rooms/hotels	3 569 16
Bank charges	145 29
ESVD Publications	9 629 91
Transfer to Brussels for Luxembourg Congress	<u>2 007 71</u>
	20 941 48

1. Comments on membership fees

The number of paying members for 1990 was 197 on the 31.1.1990.
Reminders will be sent to members who have forgotten to pay.

It is very important to pay, preferably by bank transfer, which reduces costs for the member and for the ESVD alike.

2. Comments on ESVD publications.

Vet. Derm. subscriptions + sponsoring for ESVD publications	11 934 29
Expenses for all ESVD publications	<u>- 9 029 91</u>
Net	2 304 38

3. Comments on Sponsoring.

Names of sponsors for Veterinary Dermatology and other ESVD publications :

Beecham, Cynamid, Elamol, Hill's, Pfizer, Reading, Unisabi, Vetoquinol, Wolfe.

Total :	9 210 56
Support from University of Utrecht :	<u>4 809 31</u>
	14 019 87

4. Comments on Expenditure

The Board is trying to group as far as possible the Board meetings with the different ESVD activities in order to reduce transport and accommodation costs. But this budgetary item is the most important.

Provisional Budget for 1991

Income

Estimated profit from Stockholm	210 000SEK	21 155 00
London	5 000GBP	7 000 00
Luxemburg		5 000 00
Berne	1 500CHF	900 00
Luxemburg		1 000 00
Membership fees (200 x 50)		10 000 00
Subscriptions to Vet. Derm. (150 x 20)		3 000 00
Sponsorship Vet. Derm.		10 500 00
Other sponsorship : EAVS		<u>15 000 00</u>
		79 555 00

Expenditure

Board Meeting in Paris 9.2.1991	3 025 00
Board Meetings (2 others)	6 050 00
Postage and telephone expenses	1 500 00
Vet. Derm. costs	10 000 00
Bank charges	200 00
Purchase of fax machine for Annual Congress	<u>1 400 00</u>
	(22 175 00)

Total income	79 555 00
Total expenditure	22 175 00
Estimated Profit	57 380 00

Comments on the Provisional Budget

The Stockholm Congress was largely profit-making, which was unexpected, considering the cost of living in Sweden and the distance. We owe this result to the great efficiency of the local organisation committee, which succeeded in finding a considerable sponsorship particularly in their own country.

The lesson must be learnt that the outcome from a congress is always uncertain in both directions. Our society has complete autonomy of management, and a failure for whatever reason (wave of terrorism, transport strike) would have dramatic results : therefore this un hoped-for profit will serve as insurance for the future.

The courses are, in spite of the limited number of participants, very costly to organise ; therefore, all we are seeking is their financial equilibrium.

The number of membership fees and subscriptions to Veterinary Dermatology has been estimated purposely with caution. This year the European Association for Veterinary Specialisation can offer considerable support to the ESVD thanks to European Commission funds.

In terms of expenditure, we foresee three Board meetings in 1991 and the purchase of a fax machine which will be loaned from one year to the next to the organisers of the Annual Congresses.

The Board has fixed the 1991 Annual Membership fee at 50 XEU and the subscription to Veterinary Dermatology at 30 XEU.

Pierre Cadot
Treasurer

NEWS FROM THE NATIONAL ORGANISATIONS

BELGIUM

The Belgian group of veterinary dermatology (Groupe de travail en dermatologie vétérinaire) was created on the 22nd June 1985 on the initiative of Doctor E. Fauvel.

Like other Belgian study groups it is an integral part of SAVAB (Small Animal Veterinary Association of Belgium).

For five years this group of thirty veterinary surgeons has met five times a year. Those concerned organised, alternately, a small meeting reserved for its members, and a larger meeting open to the whole profession.

The small meetings focused on a discussion of clinical cases to a chosen theme. Everyone was able to benefit from the successes and the failures of the others who had experienced rare or difficult cases.

The larger meetings take the form of conferences with a much wider audience: (one day's conference of SAVAB, post graduate seminars in the Brabant region, conferences organised by the Faculty of Veterinary Medicine, and one-day meetings put on by pharmaceutical firms).

Since 1989 our group has organised a national scientific day at the end of each year.

Because of the small size of our country, we would like the maximum contact with groups of foreign dermatologists and especially with members of GEDAC (French group).

To achieve this aim this year, we are organising the 8th congress of the ESVD in Luxembourg.

This spring the first edition of the « Cahiers Belges de Dermatologie » will appear. This journal which will be published twice a year will allow members of the profession to benefit from its scientific news.

J. Fontaine

FRANCE

In 1990, the GEDAC organised:

A two day meeting « 6^e journées du GEDAC » in June, devoted to small animal dermatology and to comparative dermatology. The meeting was held in Bordeaux. Two programmes — comprehensive and advanced — were held.

Comprehensive:

- The dermatologic examination
- Practical aids to diagnosis
- Autoimmune dermatoses
- Genodermatoses
- Feline dermatosis

Advanced:

- The skin and immunodeficiency
- Drug eruptions
- Pediatric dermatology

This very nice meeting was attended by 150 delegates.

The post congress day (CNVSPA meeting Paris), on the 1st December, was also a success with 122 delegates attending. There were two themes:

- Morning: Nodular dermatoses of man, dog, cat and horse.
- Afternoon: The diagnostic approach and therapy of pruritus in the dog and cat.

In 1991, the annual meeting of GEDAC will take place in Paris on the 21st November. The main theme is devoted to the Dermatohistopathology with J.P. Magnol (France) and Claudia von Tscharner (Switzerland). For the Pre-congress day prior to the CNVSPA meeting in Paris will be held on the 22nd November, the GEDAC associated with the GEO (Oncology Study Group of the CNVSPA) will present a programme devoted to oncology of the skin.

In addition, we hope that many French delegates will come to Luxembourg on the 6th-7th July. The programme is very interesting and Luxembourg is a very beautiful place in summer.

Eric Guaguère

GERMANY

The Veterinar-dermatologisches Arbeitskreis is a group of 200-300 veterinarians from Germany, Switzerland, France, Belgium, Austria, Italy and Luxembourg who have a great interest in veterinary dermatology. Two meetings were held in Bad Kreuznach with the following programmes.

24th-25th February: The speakers were Dr. C. Marshall, Dr. L. Ferrer, Dr. D. Carliotti, Dr. D. Lloyd, and Dr. T. Willimse. The topics were cytology in practice, clinical diagnostic procedures, differential diagnosis of pruritic skin diseases, feline allergic skin disease, Leishmaniasis and bacterial skin infections.

5th-6th May: Drs. Craig Griffin and Mark Peterson from the USA and Dr. C. von Tscharner from Switzerland spoke about hormonal skin disease. This was a repeat of the seminar given in November 1989 because of the great interest and demand for space.

Stephanie Peters

ITALY

1. AIDeV (Associazione Italiana di Dermatologia Veterinaria) organised two meetings in 1990:

1st May 1990 — Bologna, Italy.

The theme was « Pigmentary disturbances » and the speaker was Eric Guaguère (F). Some clinical cases also were presented by the members.

7th-9th December 1990 — University of Pisa.

The programme of the meeting was as follows:

- Pododermatitis (anatomy, histology and clinical features) — N. Gasparinetti, S. Taraglio, A. Vercelli, G. Raviri, C. Ciriani, R. Morganti (I).
- State of the art of round cell tumours — L. Poli (I).
- Dr. D. Lloyd (UK) gave four papers on:
 - Infection, immunity and inflammation of the skin;
 - Use and misuse of anti-inflammatory drugs;
 - Use of EFA in dermatology;
 - The importance of cytology in dermatology.

The programme for 1991 will include a seminar during the national congress of AIVPA in September. Blaise Hubert (Beriers - France), will speak on physiology and biochemistry of the sex hormones, and the clinical manifestations of sex hormone related dermatoses.

Antonella Vercelli

2. The SCIVAC Dermatology Group held three meetings in 1990 :

6th March 1990 - Brescia.

Case reports from members.

11th August 1990 - Brescia.

This meeting was the first of two study sessions on « feline dermatology », to be continued in 1991. It included case reports from members amongst which was the first case report of poxvirus in a cat in Italy. A questionnaire on feline oral diseases was sent out to all members who should fill in the form and report their findings during the next meeting (May 1991).

2nd-4th March 1990 - Pisa. National SCIVAC meeting.

The speakers were Dr. R. Halliwell and Dr. D. W. Angarano. As a representative of SCIVAC Dermatology Group, A. Fondati reported on the most common allergens causing atopy in dogs in Italy.

Alessandra Fondati

SPAIN

The Dermatology group of the AVEPA held a meeting during the annual congress of AVEPA in Barcelona in November. There were presentations of clinical cases by Drs. Luis Ferrer, Carmen Larrazabel and Pilar Sagredo. The group will hold a meeting this year in Peniscola, Castellon in September. Topics will include skin implants, otitis and endocrine alopecias.

Pilar Sagredo

SWEDEN

In 1990 the ESVD Annual Meeting was held in Sweden and this was nearly all our Dermatology Study Group could prepare this year.

When we elected Ulla Petersson, Helene Raue and Ewa Sevelius to organise the meeting we knew that they could make it. But they succeeded beyond all expectations ! I think it was a great meeting. The principal report about the meeting itself is elsewhere in this paper but I want to say something from my personal viewpoint. When Didier Carlotti asked me some years ago if we would think of having the ESVD meeting in Sweden in 1990, he also said that it would be a heavy job and was a little bit afraid of whether we could do it. I believed then and I know now that we could. But without any delegates there would not have been a conference so THANK YOU ALL VISITORS TO SWEDEN AND DJURO, SEPTEMBER 1990.

In electing these three girls, mentioned above, to the Organising Committee the meeting was just as all of us wanted it to be. Besides the instructive and superb lessons in both small and large animal dermatology, and the fun of meeting friends from all over the world, there was a nice warm and slightly unconventional feeling during the whole meeting, just enough to give

everyone a memorable time. When have you ever been to a conference where every speaker is introduced by specially written poems and thanked with a beautiful hand-crafted gift ? The congress dinner became a fantastic party, with every guest wildly participating in a big « European Song Contest » where the different countries had one marvellous solo-artist, as the winning Greece, or a whole choir of unprepared, more or less brilliant singers. It was an absolutely unbelievable experience !

The Swedish Dermatology Study Group also had a meeting in February 1990 arranged by Birgit Holm and a report on this has already been given by Helene Raue in the last Annual Report. These short conferences are excellent for participants to talk about their own dermatology problem cases ; whether small and ordinary or big and more sophisticated, it doesn't matter. We would like everyone to show slides and histopathology is also most welcome. This is good training for all of us and as a consequence we now have lots of practitioners in Sweden who have a special interest in dermatology and are able to talk the « dermlanguage ». That's nice !

In May 1991 the Group will arrange a bigger meeting with one day of ordinary discussions and case-reports and for the other days speakers will be invited from US (Peter Ihrke and Thelma Lee Gross). But more about that in the next issue of ESVD Annual Report.

Britta Ohlen

UNITED KINGDOM

The British Veterinary Dermatology Study Group held two meetings during 1990.

The annual pre-BSAVA meeting was held in Harrogate on the 19th April. Papers were presented on « Idiopathic seborrhoea in cocker spaniels » and « Topical therapeutics » by Ken Kwochka, « The role of the veterinary dermatohistopathologist » by Trevor Whitbread, « Ectoparasites of laboratory animals » by Dawn Owen and « The immune response to ectoparasites » by Professor Lord Soulsby.

A meeting was held in Glasgow on the 9th November 1990 on the theme of « Comparative aspects of infectious skin disease ». Papers were presented on « Factors influencing immunity to dermatophilosis » by Anna Sanders, « Ultrastructural aspects of the pathogenesis of dermatophilosis » by Nick Ambrose, « Pityrosporum in canine skin biopsies » by Pauline McNeil, « Pityrosporum : many theories, few proofs » by Malcolm Richardson, « Canine staphylococcal pyoderma » by Neil McEwan, « Staphylococcus epidermidis — commensal or pathogen » by Angella Farrell and « Colonization and infection of the skin by Gram negative bacilli » by Bill Noble.

The Dermatology Unit at the Royal Veterinary College held a Symposium on Otitis Externa with papers on « Allergic and immune-mediated disease » by Ton Willemsse, « Parasitic infestations » by David Grant, « Bacterial and fungal disease » by Didier Carlotti and « Conformation and the surgical approach » by Chris Little.

Richard Harvey

DERMATOPATHOLOGY GROUP OF THE ESVD

The Dermatopathology of the ESVD was definitively created in 1990. The group was constituted by 25 persons from 11 different countries. The main objectives of the group are to promote the advance of veterinary dermatopathology in Europe and to establish relationships between different people and research groups working in pathology of the skin.

During the 7th Congress of the ESVD held in Stockholm the first meeting of the group took place. Different members of the group presented clinicopathologic cases for discussion including :

- Hepatocutaneous syndrome in a dog (A. Koutinas, Greece)
- Comparative pathology of lichenoid tissue reactions (P. McNeil, Scotland).

- A case of feline SLE (M. van Niel, The Netherlands).
- Bowen's disease in three cats (V. Affolter, Switzerland).
- Immunocytochemical study of canine lymphoma (L. Ferrer, Spain).

During the meeting, the members of the group decided to begin a continuing education programme in 1991. Members of the group will circulate interesting cases to the other members. Luis Ferrer will coordinate this programme. The next meeting of the group will be in Luxembourg, the day before the Congress of the ESVD (5th July).

L. Ferrer

ESVD ANNUAL MEETING 1991 Luxemburg, 6TH-7TH JULY 1991

On the 6th/7th July 1991 the 8th Annual Congress of the ESVD will be held in the rooms of the European Parliament in Luxembourg.

The programme consists of a very interesting combination of a scientific programme and a clinical programme with speakers coming from every part of Europe and also from the U.S.A. ESVD members from all European countries have sent their recommendations for the programme, and the scientific committee did their very best to choose the most promising themes for this meeting. Not only will new therapeutic concepts and newly recognised diseases be presented, but also « state-of-the-art » lectures on modern concepts of inflammation together with a two day clinical programme on feline skin diseases. Equally the presence of G.H. Muller, R.W. Kirk and D.W. Scott, the three authors of « Small Animal Dermatology », together for the first time in Europe, sounds very attractive. While all presentations will be given in English, the clinical programme will be translated simultaneously into German and French. Between 400 to 600 participants (mostly practitioners) from all over Europe and possibly from the USA may be expected.

Not only is the scientific programme exciting, but Luxembourg itself (both town and country) is worth visiting. The « Green Heart of Europe » is an ideal location in the centre of Europe between Belgium, Germany and France, and is easily accessible from all directions ; by bus, train, plane and car. The landscape is a very charming mixture of contrasts. North of the River Sauer, the Luxembourgian part of the Ardenne Hills (« Osling » or Islek) is located with numerous castles mostly built in the Middle Ages, and picturesque deep river valleys and extensive forests. Some of the most important towns are Clervaux (beautiful 800 year-old castle, Benedictine Abbey), Wiltz (old castle, Witches' Tower) and Viaden (« most beautiful

castle on the left side of the Rhine », the house of Victor Hugo and the fjord-like storage-lake of the River Our which has one of the biggest pumping works world-wide). In the middle of the country an area called « Luxembourgian Switzerland » is located around Echternach. It is said to be Luxembourg's most beautiful part. The old cathedral with the grave of St. Willibrord who came from England and was the founder of the town, and the St. Peter and Paul Church and the Market Place are all very impressive.

The southern part of Luxembourg, the « Gutland », is largely agricultural, and much fruit is grown there. In the south-west (at the French border) the « land of the red earth » around Esch s. Alzette, Dudelange and Rodingen, is the home of the iron and steel industry in which Luxembourg ranks 15th and 17th respectively world-wide. Along the River Mosel, at the German border, Luxembourg's wine growing region can be found. Riesling, Silvaner and Elbling predominate and wine-tasting visits are a must (the wine has a relatively low alcohol content !).

The town of Luxembourg is well known as the seat of many European organisations, banks, etc. Founded in the year 963, it is hard to mention only a few sights reminding one of the long history. The castle Lutzelburg, the cathedral with the sarcophagus of the Emperor Johann « the Blind », the Palace of the Duke, Goethe's Stone, some of the numerous bridges, especially the Adolphe Bridge and the grave of Wilhelm Voigt (better known as the « Hauptmann von Kopenick ») should be visited.

The unique combination of most attractive locations and congress programme in the best time of summer promises to become a most unforgettable event for veterinary dermatologists, practitioners and their spouses alike.

Plan now to attend : THE SECOND WORLD CONGRESS OF VETERINARY DERMATOLOGY

WHEN ? MAY 13-16, 1992

Spring is blooming in all of it's glory at this time of year in Montreal.

In 1992, Montreal will celebrate the 350th Anniversary of its founding, an occasion for celebrating with many festivities.

It is the ideal time to combine the meeting with holiday visits to other parts of Canada and the United States.

WHERE ? MONTREAL, QUEBEC, CANADA

Montreal is a very special city ! It is one of the few really bilingual large cities in the world with a rich historical past, a dynamic present and an exciting future.

Visitors feel safe and are charmed by the hospitable welcome.

There is much to do in Montreal with harmony between past and present in

the downtown sector, historic Old Montreal, the Underground City, Mont-Royal, the Saint Lawrence Seaway and the Olympic Village. The delights of memorable side trips include the Laurentian Mountains, Eastern Townships and, of course, Quebec City.

There is easy access to Montreal by air from all parts of the world and by train and road from all parts of North America.

The meeting will be held in the heart of the city at the elegant Queen Elizabeth Hotel. This beautiful historic hotel has long been the symbol of excellence in accommodations in Montreal and all guest rooms have been remodelled in the last two years.

The Queen Elizabeth's Conference Center is especially suited to the needs of the World Congress. All rooms are conveniently located on one floor and spacious enough to handle the large attendance expected at this meeting.

WHAT ? THE SCIENTIFIC PROGRAM

Three days.

Five State-of-the-Art Addresses by world class speakers on five Main Themes.

Several Supporting Papers for each theme representing current unpublished research.

The Main Themes :

- The Skin as an Immunologic Organ
- Keratinisation Abnormalities
- Connective Tissue and Autoimmune Skin Diseases
- Neoplasia and Pseudoneoplasia
- Parasitic Skin Diseases.

Two Clinicopathologic Conferences (case presentations) with four leading international veterinary dermatopathologists.

Over 14 hours of Continuing Education courses presented by 15 different world class speakers. The largest group of leading teachers in veterinary dermatology will present a clinically oriented continuing education course unequalled at any other dermatology meeting in the world. Some of the topics to be covered include :

- Pyoderma
- Diagnosis of endocrine dermatoses
- New drugs in veterinary dermatology
- Topical therapy in veterinary dermatology
- Otitis externa
- Autoimmune skin diseases
- Management of the allergic cat
- Management of the atopic dog.

Fifteen Workshops for informal group exchange of ideas on current topics of interest to practitioners including :

- Non-steroidal antipruritic drugs
- In vitro and in vivo testing in atopy
- Use of hypoallergenic diets
- Treatment of recurrent pyoderma
- Equine pruritus
- Malassezia dermatitis
- Otitis externa
- Essential fatty acids
- Shampoo and other topical therapy
- Sex hormone and growth hormone alopecia
- Drug eruptions.
- Dermatopathology of newly described diseases
- Hypothyroidism
- Stomatitis in cats
- Economic dermatoses of food animals

Free Communications and Poster Session to insure maximum exposure to the most current information in veterinary dermatology.

Commercial exhibits featuring the innovative and important products essential to the practice of veterinary dermatology.

Hardbound proceedings will be published as "Advances in Veterinary Dermatology, Volume II". Price included in registration fee.

Congress languages will be English and French.

THE SOCIAL PROGRAM

Opening Ceremony with cocktails, wine and cheese in a site which will exemplify the true character of Montreal.

An Evening of Music at one of Montreal's beautiful basilicas.

A Closing Banquet and Ball featuring superb wine, food and entertainment.

Pre- and post-Congress tours and packages will be available.

Tourist visits in and around Montreal during the Congress.

SUBMISSION OF SUPPORTING PAPERS

Veterinarians and others interested in presenting original, unpublished research papers should submit abstracts to the Program Chairman :

Dr. Stephen D. White
Department of Clinical Sciences
College of Veterinary Medicine
Colorado State University
Fort Collins, CO 80523
USA.

Supporting papers will be selected from research in the following areas :

- The Skin as an Immunologic Organ
- Keratinisation Abnormalities
- Connective Tissue and Autoimmune Skin Diseases
- Neoplasia and Pseudoneoplasia
- Parasitic Skin Diseases

Deadline for submission of Supporting Papers is the 1st September 1991.

SUBMISSION OF FREE COMMUNICATIONS AND POSTERS

Short papers for oral presentation (12 minutes) and posters are invited on any recent developments which are significant to veterinary dermatology.

Typewritten, double-spaced abstracts of less than 300 words, excluding the title and address, describing the work should be sent to the Programme Chairman before the 1st January 1992. Authors of papers and posters accepted for the Congress will be notified by the 1st February 1992. Abstracts should include a descriptive title and the name(s) and address(es) of the contributors. The name of the speaker should be underlined.

REGISTRATION AND ENQUIRIES

Apply to the Congress Secretary :

Dr. Kenneth W. Kwochka
College of Veterinary Medicine
The Ohio State University
1935 Coffey Road
Columbus, Ohio, 43210, USA

In Europe, registration details are available from :

Dr. David H. Lloyd
Royal Veterinary College
Hawkshead House
Hawkshead Lane
North Mymms, Hatfield, Herts. AL9 7TA
United Kingdom.

VETERINARY DERMATOLOGY PUBLICATIONS 1990

A

- Allaker R.P., Lloyd D.H. and Lampion A.I. (1990). – Bacterial interference in the control of exudative epidermitis in pigs. *Advances in Veterinary Dermatology* 1 : 325-334.
- Allaker R.P., Lloyd D.H. and Lampion A.I. (1990). – Interaction of *Staphylococcus hyicus* and an inhibitor-producing strain of *Staphylococcus chromogenes* on the skin of gnotobiotic piglets. *Veterinary Dermatology*, 1 (2), 93-95.
- Allaker R.P., Lloyd D.H., Smith I.M. and Noble W.C. (1990). – Interaction of *Staphylococcus hyicus* with inhibitor-producing bacteria on the skin of gnotobiotic piglets. *Microbial Ecology in Health and Disease*, 3, 19-24.
- Allaker R.P., Lloyd D.H. and Lampion A. (1990). – The control of *Staphylococcus hyicus* infection by bacterial antagonism. *Deutsche Veterinärmedizinische Gesellschaft e.v. Tagung der Fachgruppe «Bacteriologie»*, May 1990, 131-136.
- Anderson W.I., Scott D.W. and Cramer F.M. (1990). – Two rare cutaneous neoplasms in horses: apocrine gland adenocarcinoma and carcinocarcinoma. *Cornell Vet.* 80 : 339-345.
- Aronsohn M.G. and Carpentier J.L. (1990). – Distal extremity melanocytic nevi and malignant melanoma in dogs. *J. Am. Anim. Hosp. Assoc.* 26 : 605-612.
- Ascher F., Maynard L., Laurent J. and Goubet B. (1990). – Controlled trial of ethyl lactate and benzoyl peroxide shampoos in the management of canine surface pyoderma and superficial pyoderma. *Advances in Veterinary Dermatology* 1 : 375-382.

B

- Barbet J.L., Bevier D. and Greiner E.C. (1990). – Specific immunotherapy in the treatment of *Culicoides* hypersensitive horses. *Equine Vet. J.* 22 : 232-235.
- Basset H.F., Monaghan M.L., Lenhan P., Doherty M.L. and Carter M.E. (1990). – Bovine digital dermatitis. *Vet. Rec.* 126 : 164-165.
- Belknap E.B. and Dunstan R. (1990). – Congenital ichthyosis in a llama. *J. Am. Vet. Med. Assoc.* 197 : 764-767.
- Bennet M., Gaskell C.G., Baxby D., Gaskell R.M., Kelly D.F. and Naidoo J. (1990). – Feline cowpox virus infection. *J. Small Anim. Pract.* 31 : 167-173.
- Bevier D.E. (1990). – The reaction of feline skin to the intradermal injection of allergenic extracts and passive cutaneous anaphylaxis using serum from skin test positive cats. *Advances in Veterinary Dermatology* 1 : 126-136.
- Blewenga W.J., Rijneberk A. and Mol J.A. (1990). – Persistent polyuria in two dogs following adrenocorticalysis for pituitary-dependent hyperadrenocorticism. *Vet. Quart.* 11 : 193-197.
- Bourdeau P. – Antibiotics in the treatment of the otitis externa. *Rec. Med. Vet.* 1990, 166, 3, 275-281.
- Bourdeau P. – Antibiotics in the treatment of canine pyoderma. *Rec. Med. Vet.* 1990, 166, 3, 335-343.
- Bourdeau P. – Geriatric dermatology. *Point Vet.* 1990, 22, 130, 272-300.
- Burrell D.H. (1990). – The bacteriology and pathogenesis of fleece rot and associated myiasis; Control of these diseases with *Pseudomonas aeruginosa* vaccines. *Advances in Veterinary Dermatology* 1 : 347-358.

C

- Campbell C.K. (1990). – Pythiosis. *Equine Vet. J.* 22 : 227-228.
- Campbell K.L. and Davis C.A. (1990). – Effects of thyroid hormones on serum and cutaneous fatty acid concentrations in dogs. *Am. J. Vet. Res.* 51 : 752-756.
- Carlotti D.N. (1990). – Canine hereditary black hair follicular dysplasia and colour mutant alopecia: Clinical and histopathological aspects. *Advances in Veterinary Dermatology* 1 : 43-46.

Chalmers S.A. and Medleau L. (1990). – Identifying and treating sex-hormone dermatoses in dogs. *Vet. Med.* 1317-1324.

Cooper J.E. (1990). – Skin diseases of ferrets. *Vet. Annual* 30 : 325-334.

Cullen L.K. and Reynoldson J.A. (1990). – Central and peripheral-adrenoreceptor actions of amitraz in the dog. *J. Vet. Pharmacol. Therap.* 13 : 86-92.

D

- Danvy R.M. – A case of contagious ecthyma in sheep. *Point Vet.* 1990, 22, 130, 489-493. A severe case of contagious ecthyma was observed in adult sheep. Clinical signs necropsy findings and histology of the disease are described. Concurrent mucormycosis was reported. The main clinical criteria and epidemiology of ecthyma, as well as differential diagnosis, prevention and treatment are discussed. Contagious ecthyma is shown to be a spectacular zoonosis.
- De Boer D.J., Schultz K.T., Thomas C.B. and Moriello K.A. (1990). – Clinical and immunological responses of dogs with recurrent pyoderma to injections of staphylococcus phage lysate. *Advances in Veterinary Dermatology* 1 : 335-346.
- De Boer D.J., Turrel J.M. and Moore P.F. (1990). – Mycosis fungoides in a dog: demonstration of T-cell specificity and response to radiotherapy. *J. Am. Anim. Hosp. Assoc.* 26 : 566-572.
- De Boer D.J., Moriello K.A., Thomas C.B. and Schultz K.T. (1990). – Evaluation of a commercial staphylococcal bacterin for management of idiopathic recurrent superficial pyoderma in dogs. *Am. J. Vet. Res.* 51 : 636-639.

F

Fadok V.A. and Greiner E.C. (1990). – Equine insect hypersensitivity: skin test and biopsy results correlated with clinical data. *Equine Vet. J.* 22 : 236-240.

G

- Geest J. de, Muylle E., Deprez P. and Maenhout T. (1990). – An outbreak of cutaneous vasculitis in newborn calves. *Vlaams Diereneskundig Tijdschrift* 59 : 7-11.
- Gilbert P.A., Griffin C.E. and Walder E.J. (1990). – Diffuse trunkal lipomatosis in a dog. *J. Am. Anim. Hosp. Assoc.* 26 : 586-588.
- Gilbert P.A., Griffin C.E. and Walder E.J. (1990). – Nodular dermatofibrosis and renal cystadenoma in a German shepherd dog. *J. Am. Anim. Hosp. Assoc.* 26 : 253-256.
- Grant D.J. (1990). – Bacterial skin disease of the dog. *Vet. Annual* 30 : 315-324.
- Griffin C.E., Moriello K.A. and De Boer D.J. (1990). – The effect of serum IgE on an *in vitro* ELISA test in the normal canine. *Advances in Veterinary Dermatology* 1 : 137-144.
- Gross T.L. and Ihrke P.J. (1990). – The histologic analysis of endocrine-related alopecia in the dog. *Advances in Veterinary Dermatology* 1 : 77-88.
- Gross T.L., O'Brien T.D., Davies A.P. and Long R.E. (1990). – Glucagon-producing endocrine tumors in two dogs with superficial necrolytic dermatitis. *J. Am. Vet. Med. Assoc.* 197 : 1619-1622.
- Guaguère E., Alhaidari E., Magnol J.P. – Granulomatous sebaceous adenitis: description of three cases. *Prat. Med. Chir. Anim. Comp.* 1990, 25, 2, 169-175. The authors describe three cases of granulomatous sebaceous adenitis and define the elements of the clinical and histological diagnosis and treatment.
- Guaguère E. – Seborrhea part 1. Physiopathology – clinical signs – Etiology. *Prat. Med. Chir. Anim. Comp.* 1990, 25, 2, 177-127.
- Guaguère E. – Seborrhea part 2. Diagnosis, treatment. *Prat. Med. Chir. Anim. Comp.* 1990, 25, 3, 197-204.

Guaguère E. – Retinoids in canine and feline dermatology. *Prat. Med. Chir. Anim. Comp.* 1990, 25, 4, 419-427. Retinoids are structural analogues of Vitamin A used in dermatology and cancerology having a number of properties: checking the proliferation and epithelial differentiation, immunomodulatory and anti-inflammatory effects, action on the sebaceous function. Their secondary effects on the human organism are well-known – teratogenesis and hypervitaminosis A, but these effects have not been described in dogs and cats. Their applications concern keratinization defects and some cutaneous tumors. Their recent utilisation requires us to be extremely prudent when prescribing them.

Guaguère E. and Picard G. – Utilisation of Cefalexin and Ethyl lactate in treatment of canine pyoderma. *Prat. Med. Chir. Anim. Comp.* 1990, 25, 5, 547-551. The concomitant use of Cefalexin and Ethyl lactate seems particularly effective in the treatment of canine pyoderma (92.1 % of positive results).

Magnol J.P. – Skin tumors of dogs and cats. *Rec. Med. Vet.* 1990, 166, 11, 1061-1074. In the study of cancer of domestic animals the skin and its related tissues constitute a preferential site for tumors. In this amply illustrated article are presented for comparison the most important primary tumor and certain facts concerning secondary or metastatic tumor like lesions. Primary tumors are approached by distinguishing between: tumors of the superficial epithelium basal cell and adnexal gland tumors, dermal and subcutaneous tumors, tumors of melanin-producing cells and hemolymphopoietic tumors.

Paradis M., Scott D.W., and Villeneuve A. (1990). – Efficacy of ivermectin against *Cheyletiella blakei* infestation in cats. *J. Am. Anim. Hosp. Assoc.* 26 : 125-128.

Prelaud P. (1990). – Basophil degranulation test in the diagnosis of canine allergic skin diseases. *Advances in Veterinary Dermatology* 1 : 115-125.

Prelaud P. – Allergic dermatitis in the dog and cat. Ed. Masson 1990. All aspects of allergic skin diseases are reviewed : recent description of the knowledge of fundamental allergy mechanism in man, dog and cat, description of the main responsible allergens in Europe, description of the diseases associated or suspected to be associated, to an hypersensitivity mechanism, the diagnostic methods, symptomatic therapy and specific therapy. Skin testing and in vitro testing are reviewed in detail, insisting on the difference of quality of allergenic extracts used in Europe and in vitro tests routinely used in France such as allergen specific IgG determination and basophil degranulation. This is not only a dermatology book, but a real book on allergy, with European point of view on the prevalence of allergens and the way to choose and manage an immunotherapy.

Scott D.W. – Equine discoid lupus erythematosus. *Point vet.* 1990, 22, 127, 7-11. Three cases of discoid lupus erythematosus are described in horses. The dermatosis is characterised by annular areas of alopecia which are erythematous, scaly, more or less symmetrical, and localised to the face and neck. The disorder is worse in summer and there is no systemic involvement.

Histologically, a lichenoid and hydropic interface dermatitis is seen. Direct immunofluorescence testing reveals the deposition of immunoglobulin G at the dermoepidermal junction. The dermatosis is well controlled with oral corticosteroids and photoprotection. Comparative aspects with DLE in man and dog are presented.

Scott D.W. – Dermatohistopathology of hypersensitivity to culicoides fly bites in horses. *Point Vet.* 1990, 22, 131, 583-588. Culicoides hypersensitivity is the most common allergic skin disease in the horse. A retrospective histopathologic study was performed on the skin biopsies from 21 horses with this dermatosis. The typical histologic appearance is that of a perivascular dermatitis, most commonly superficial and deep, and most often hyperplastic. A second, more focal inflammatory pattern was present, including eosinophilic granulomatous dermatitis or intraepidermal pustular (neutrophilic) dermatitis.

Scott D.W., Gourreau, J.M. – Alopecia areata in cattle. *Point Vet.* 1990, 22, 132, 671-674. Alopecia areata is rarely reported in cattle. It is an idiopathic disease in which immunologic mechanisms are thought to play a role. The dermatosis is characterized by one or several annular areas of alopecia, especially on the face, head or neck. Skin in the areas of alopecia appears normal. The lesions are neither pruritic nor painful, and affected cattle are otherwise healthy. Skin biopsy is diagnostic, revealing a lymphocytic peribulbar perifolliculitis. Animals with localised lesions may undergo spontaneous remission after a few months. Animals with more generalised lesions may never improve. There is presently no effective treatment.
