## TRAVEL GRANT

building bridges between  
nations and generations

This grant is meant to foster veterinary dermatology education in less well-funded countries. By providing financial support to highly motivated veterinarians from diverse geographic areas, who wish to attend the annual ESVD-ECVD congress or the world congress. As a sponsor you will help to nurture a new generation of Dermatologists to bring them into our 'derm family'. We believe that this 'positive energy flow' raises the horizons of the whole 'Derm community', making it bigger, fresher and richer.

Salzburg 2014

## TRAVEL GRANT

building bridges between  
nations and generations

**Our special ‘meet and greet’ event at the beginning of Congress allows sponsors and winners to socialize and build new contacts.**

### **Laura Udraite-Vovk, Lithuania**

It was my first congress and I am really impressed by the amount and the quality of the information I have got there. Besides that, I had the opportunity to meet a lot of new interesting people, colleagues from different countries, making new friends and share experiences. The social events were great!

### **Tina Kotnik, Slovenia**

To everyone that didn't decide yet, and amongst them there are our students, I shall strongly recommend to become a part of this great and friendly Dermatology family.

### **Anna Gerke, Russia**

It was a good chance for me to listen excellent speakers to learn something new. All new information that I got out here I will use in my practice and will introduce to colleagues in my country. I also met new colleagues and speakers, who had willing to share their experiences.
